

MANPREET KAUR

Bengaluru, India | kaur.exe@gmail.com | +91 95697 80002 | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Software Engineer with 4+ years building and scaling backend services and full-stack web apps for platforms serving 1M+ users. Experienced with microservices, REST APIs, and high-availability systems (99.9% uptime, sub-200ms p95) across PostgreSQL, MongoDB, and SQL Server, plus shipping LLM- and RAG-based features. Owns work from design through deployment and mentors engineers.

WORK EXPERIENCE

Software Engineer, Deloitte USI, Bengaluru

Jul 2022 – Present

Backend & Full-Stack Engineering

- Built and scaled backend services and REST APIs across 12+ production applications serving 1M+ users, sustaining 99.9% uptime and sub-200ms p95 responses via query optimization and indexing on PostgreSQL, MongoDB, and SQL Server.
- Cut production defects 60% and raised team velocity 40% by building GitHub Actions CI/CD pipelines with Docker and automated quality gates, and mentoring 8 engineers through code and design reviews.
- Shipped 3 production front-ends in 6 months in React and TypeScript: a 200+ daily-user operations dashboard, a beneficiary-facing portal, and a 30+ component reusable UI library adopted by 4 teams that cut build time 35%.
- Built modular Node.js / Express microservice layers exposing versioned REST contracts to downstream systems, and integrated 12+ third-party APIs with error handling, retries, and contract versioning.
- Eliminated 80+ hours of weekly manual processing (~\$150K saved annually) by building workflow-orchestration automation.

Integration Developer Intern, Deloitte USI, Bengaluru

Jan 2022 – Jun 2022

Healthcare Data Integration

- Built 20+ HL7/XML integration interfaces for healthcare message flows across distributed systems (structured logging, retry handling, exception-safe parsing), and automated MOVEit file-transfer pipelines to improve data accuracy 30%.

PROJECTS

Caffehop, Full-Stack Coffee Discovery Platform · [caffehop.com](#)

Next.js 14 · React · TypeScript · Node.js · Express · MongoDB · JWT · Tailwind CSS

- Independently built and shipped a full MERN app to production (Next.js 14, Express REST API, MongoDB Atlas), owning data layer to UI.
- Custom auth: email OTP (SHA-256, TTL-expiring), short-lived JWTs with refresh-token rotation and reuse detection, bcrypt, rate limiting, Zod validation.
- Modular Express backend with push-based CI/CD across Vercel and Render; automated HTTPS and CORS.

CodeLens CLI, Multi-Agent LLM Code Review Tool · npm

TypeScript · Node.js · LLM APIs · RAG · Vector Search · SSE

- CLI that reviews git diffs through a two-agent LLM pipeline: a RAG context agent grounds a review agent, orchestrated across four stateful stages.
- Pluggable provider layer (Ollama, Gemini, Mistral) swappable by one config key, with backoff retry and automatic fallback on failure.
- RAG retrieval over an in-memory cosine-similarity vector store; streams reviews token-by-token to the terminal and via SSE.

SKILLS

Languages: JavaScript, TypeScript, Python, C#, SQL

Backend & Data: Node.js, Express, REST APIs, Microservices, PostgreSQL, MongoDB, SQL Server, Redis

Frontend: React, Next.js, Angular, Tailwind CSS

Cloud, AI & Practices: AWS, Docker, CI/CD, Vercel, LLM APIs, RAG, System Design, Testing, Agile, Code Review, Git

EDUCATION

B.E., Computer Science, Thapar Institute of Engineering and Technology, Patiala

2018 – 2022

ACHIEVEMENTS

- Deloitte Hackathon Finalist: built an AI-powered contract-review tool; ranked top 5 of 300+ national teams.
- Spot Award (2023, 2026) and Applause Award (2024), Deloitte USI, for sustained engineering impact.
